

Winner Data News Award for Excellence - Belgian Scaleup of the Year!

September 24, 2021

23 September 2021.

On Thursday evening, the Data News Awards for Excellence took place.

The Data News Awards reward companies, products and individuals from 14 important categories within the ICT sector. From a few hundred nominations, the Data News readers drew up the shortlist for the Awards. A jury chose the final winners from this list.

Unifiedpost Group won in the category '**Belgian Scaleup Company of the Year!**

The jury acknowledges that 2020 was the year of Unifiedpost: capital rounds, acquisitions and an IPO! They also appreciated the fact that we create value every day with our product development, for example by automating financial processes.

“Very thankful and proud of this great recognition for the intense growth path of our company and the hard work of everyone.”

Hans Leybaert, CEO of Unifiedpost Group.
